- [FreeBSD find CPU \(processor\) temperature command](#) [2]

- [LF - Feature Rich Terminal Manager for Linux](#) [3]

In this guide, we will cover the installation and usage of LF file manager on Linux. LF which is an abbreviation of (List files) is console file manager written in Go.

LF provides minimalistic and nice curses interface with a view on the directory hierarchy on terminal. It gives you a quick way to switch directories and browse the file system.

- [Scout Realtime ? Monitor Server and Process Metrics in Linux](#) [4]

- [An introduction to Go arrays and slices](#) [5]

- [Control your browser like a pro! Plasma browser integration](#) [6]

- [A sysadmin's guide to SELinux: 42 answers to the big questions](#) [7]

Security. Hardening. Compliance. Policy. The Four Horsemen of the SysAdmin Apocalypse. In addition to our daily tasks?monitoring, backup, implementation, tuning, updating, and so forth?we are also in charge of securing our systems. Even those systems where the third-party provider tells us to disable the enhanced security. It seems like a job for Mission Impossible's Ethan Hunt.

Faced with this dilemma, some sysadmins decide to take the blue pill because they think they will never know the answer to the big question of life, the universe, and everything else. And, as we all know, that answer is 42.
