- [July security updates: Chromium and Flash](#) [2]

I have uploaded new packages for Chromium. The version 67.0.3396.99 was released a month ago but the source remained unavailable for a while and then I ?went under? for a while. Now that I finally built and uploaded it, I noticed there?s a new version up today (68.0.3440.75) but I will wait a bit with that one and focus on Plasma5 next.
