Linux Mint 19.1 Will Feature a "Modern" Desktop Layout

By Roy Schestowitz
Created 31/10/2018 - 10:09pm

We’re expecting the release of Linux Mint 19.1 to arrive just before the Christmas holidays and, like your nearest and
dearest, it'll be bringing a few surprises with it.

The Linux 19.1 release will include the Cinnamon 4.0 desktop environment by default and this, Mint's devs say, will look more modern than it does not.

How? By using a new panel layout.
