[Ubuntu Podcast from the UK LoCo: S11E35 ? Stranger on Route Thirty-Five](#) [2]

This week we've been using windows Subsystem for Linux and playing with a ThinkPad P1. IBM buys RedHat, System76 announces their Thelio desktop computers, SSD encryption is busted, Fedora turns 15, IRC turns 30 and we round up the community news.

It's Season 11 Episode 35 of the Ubuntu Podcast! Alan Pope, Mark Johnson and Martin Wimpress are connected and speaking to your brain.

[Episode 6: Conferences and Community](#) [3]

Katherine Druckman talks to Doc Searls about Freenode Live, conferences, and the Linux community.

[The One About DevSecOps](#) [4]

Bad security and reliability practices can lead to outages that affect millions. It's time for security to join the DevOps movement. And in a DevSecOps world, we can get creative about improving security.

Discovering one vulnerability per month used to be the norm. Now, software development

moves quickly thanks to agile processes and DevOps teams. Vincent Danen tells us how that's led to a drastic increase in what's considered a vulnerability. Jesse Robbins, the former master of disaster at Amazon, explains how companies prepare for catastrophic breakdowns and breaches. And Josh Bressers, head of product security at Elastic, looks to the future of security in tech.
