January saw quite a few new Tizen games to hit the Top 20 most popular downloaded list. Unfortunately, we didn't see any new Tizen smartphone apps in this Tizen Store list. WhatsApp Messenger, Facebook, and Facebook Messenger still enjoy the top 3 positions respectively. I don't think anything will shake them off that pedestal now.

As I said earlier there are quite a few new games in the Top 20. Top of the games list we have Bounce Classic, as the name implies, is a classic bounce game that relies on physics. You need to avoid the spikes and thorns and jump through the hoops in order to earn points. It has the original 11 bounce levels as well as 5 new custom ones. Ghost Moto simulator is a role play game, where you need to balance your bike and dodge unexpected hurdles. Another new entry at number 11 is the classic Snakes and Ladders game. Initially you have one board to play on with a choice of 8 characters. The idea is to earn stars as you go.
