- [New Google Program Applies Technical Writers to Open Source Documentation](#)[3]

Google yesterday announced a new program, Seasons of Docs, that aims to make a substantive contribution to open source software development. The eight-month project will assemble a team of technical writers to work on improving documentation development for various open source projects.

- [Google introduces Season of Docs that will connect technical writers and mentors with open source projects](#)[4]

Just two days ago, the team at Google announced Season of Docs, a new program which will connect technical writers with open source projects. Season of Docs will help in bringing technical writers and open source projects together in order to work on open source documentation.

- [Google's ?Season of Docs? program pairs technical writers with open source projects](#)[5]

As a company, Google contributes to open source by releasing code and tools to the community, as well as supporting various projects. Its latest is called ?Season of Docs? and is

aimed at bringing together technical writers and open source projects to work on documentation.
