- **Episode 18: KidOYO**

  Doc Searls talks to Zhen, Devon and Melora Lofretto of KidOYO and Doctor Michael Nagler, superintendent of the Mineola Public School system in Mineola Long Island.

- **Linux Voice Introduction**

  Today's computer magazines talk about big ideas and new age concepts, like containers, cloud computing, and software-defined infrastructure, but we at Linux Voice know that one of the reasons you own you computer in the first place is to take care of everyday tasks more efficiently and without the clutter.

  Linux is home to dozens of useful tools for taking notes and managing to-do lists. This month we feature Joplin, a powerful open source note-taking app that organizes your notes in a searchable form and even supports synchronization with several popular cloud platforms. We also investigate the Unforeseen Incidents point-and-click mystery game, and our tutorial series continues with a look at Bash math functions and more on designing 3D objects with OpenSCAD.
