- [17 Best Free Project Management Tools for You](#) [2]

Whether you are a single user with many tasks, a startup company, or an already established business looking for an efficient way to plan your workflow and organize your projects, there are several project management tools you can use to get work done.

They are modern, easy to manage, and best of all, easy to get up to speed with if you're a newcomer to project management.

Here is our list of the best project management tools you can use to increase your productivity and that of your team for free.

- [Browse with full color: Vivaldi browser enables Razer Chroma](#) [3]

Today, we launch Vivaldi 2.5 which brings a first-of-its kind integration with Razer Chroma, the world's largest lighting ecosystem for gaming devices. With this unique integration, you'll enjoy a thrilling and immersive browsing experience with lighting effects on Chroma-enabled devices.

It sounds wild, but trust us ? it's fun. And adds another dimension to your browsing altogether.

We've also added more customization options in this update where you can adjust the size of Speed Dials and select tabs more easily.
