- [Destination Linux EP122 ? Richard Brown of openSUSE](#) [2]

On this episode of Destination Linux we sit down with Richard Brown, of openSUSE, for an interview about his journey into Linux and becoming the Chairman of openSUSE.

- [Major Distro Upgrade In The Public Cloud Made Easy](#) [3]

Well, SUSE Linux Enterprise Server 15 has been released for a while and SLES 15 SP1 is on the horizon. While there will be another service pack in the SLES 12 series, SLES 12 SP5, many people have expressed interest to move to SLES 15 from SLES 12. After providing a ?Follow this long tedious manual process? procedure for the SLES 11 to SLES 12 migration that was certainly not for the faint of heart we wanted to provide a better easier way to migrate an instance while at the same time avoiding some of the pitfalls that are inherent in a running system migration. This gave birth to the suse-migration-services project. We are happy to announce the availability of the migration in the SLES 12 Public Cloud module.
