SinoVoip has launched its previously revealed 'Banana Pi BPI-M4' SBC for \$38. The Raspberry Pi-like board runs Linux on a quad -A53 Realtek RTD1395 and offers HDMI, M.2, WiFi/BT, 40-pin GPIO, PoE, and 5x USB ports.

When SinoVoip announced its Banana Pi BPI-M4 in February, it suggested the board would be coming soon. As it turned out, four months have passed, but the BPI-M4 is now available for \$38 with 1GB RAM and 8GB eMMC on AliExpress.
