In the last few years, blogging has become a popular way of sharing one's thoughts about almost anything. While people use blogs to express themselves, businesses go with blogging to cement their position as a competent authority in their area of operations. Over the past years, many have taken on blogging as various blogging software makes it as simple and straightforward as possible. Now, you can create a blog site even if you lack technical skills such as coding and web development.

Today, blogging software is being created for every operating system, not just for Windows and Mac. Since bloggers who want to make themselves heard are using different operating systems, it is essential to help you identify the best blogging software for Linux as well. Here are the top four blogging software for Linux.
