LKML.ORG

Another week, another -rc.

It's been calm, and nothing here stands out, except perhaps some of the VM noise where we un-reverted some changes wrt node-local vs hugepage allocations.

The rest is the usual driver fixes (usb, sound, nvme, habanalabs, rdma..) some arch updates (arm64 and x86) along with some filesystem fixes (afs and btrfs).

But all of it is really quite small.
