The logo for MicroK8s, featuring the text "MicroK8s" in a white, sans-serif font centered on a solid orange rectangular background.

We are excited to announce new Cilium and Helm add-ons, coming to MicroK8s! These add-ons add even more power to your Kubernetes environment built on MicroK8s. The Cilium CNI plugin brings enhanced networking features, including Kubernetes NetworkPolicy support, to MicroK8s. You'll also get direct CLI access to Cilium within MicroK8s using the `microk8s.cilium` wrapper.

If you do not already have a version of cilium installed you can alias `microk8s.cilium` to `cilium` using the following command:

```
snap alias microk8s.cilium cilium
```

Helm, the package manager for Kubernetes will allow even easier management of your MicroK8s environment.
