- [Akademy Report](#) [3]

?Who are you people??

That?s what the woman selling the ferry tickets at Varenna asked me once she realized I speaked Italian. She was definitely not used to a group of ~80 people wearing a blue badge. Another woman who was selling stuff on the street asked me if we were a school.

It?s been an amazing week and a very productive Akademy. A lot has been discussed and a lot has been decided. On my side, I?ve hosted a Dolphin BoF where we discussed both boring things (e.g. where to send bugzilla notification mails) as well as the awesome new features we are getting into Dolphin. Alexander talked about the status of the KIO Fuse project, while Méven talked about his work on the kioslave for the recently used files.

- [Akademy 2019 Wednesday and Thursday BoF Wrapup](#) [4]

Wednesday continued the Akademy BoFs, group sessions and hacking in the morning followed by the daytrip in the afternoon to Lake Como, to have some fun, get away from laptops and get to know each other better. Thursday was back to BoFs, meetings and hacking culminating in a wrapup session at the end covering the last two days so that what happened in the different rooms can be shared with everyone including those not present.
