The Document Foundation announces LibreOffice 6.3.2, the second minor release of the LibreOffice 6.3 family, with many bug and regression fixes. LibreOffice 6.3.2 ?fresh? is targeted at technology enthusiasts and power users, who are suggested to update their current version.

LibreOffice?s individual users are helped by a global community of volunteers: <https://www.libreoffice.org/get-help/community-support/>. On the website and the wiki there are guides, manuals, tutorials and HowTos. Donations help us to make all of these resources available.
