Docker, the technology, is famous. It kick-started the container revolution. Docker, the company, is famous for failing to profit on its technology. Now, in a move indicating that Docker CEO Rob Bearden wasn't able to obtain badly needed capital, Mirantis, a prominent OpenStack and Kubernetes cloud company, has acquired Docker Enterprise product line, developers, and business.

The deal is effective immediately. Mirantis CEO and co-founder Adrian Ionel, said in an e-mail interview, "We are not disclosing the terms of the deal. The deal closes Wednesday [Nov. 12, 2019] morning."
