- **Scrapyard is an advanced bookmarks manager for Firefox** [2]

  Scrapyard is an open source extension for the Firefox web browser designed to improve bookmarking in Firefox in multiple ways. Firefox users may use it to bookmark pages but also content on pages, and store the data locally.

  Firefox's default bookmarks functionality is quite basic. Users may bookmark webpages or sites, add tags to bookmarks, use folders to sort bookmarks, and use Firefox's synchronization feature to sync bookmarks across devices.

  Firefox users who require more functionality need to rely on add-ons for that. Bookmarks Organizer is a handy extension to find dead or redirecting bookmarks.

- **4 Best Open Source NAS Software for DIY server in 2020** [3]

  Before listing Linux or FreeBSD distros for creating network Attached storage OS, I would like to say there is no best operating system? either for NAS or computer. The choice of an operating system depends heavily on what you are going to do with the NAS server. In this guide, we focus on software that understands a NAS server primarily as a system for the provision of data in your office or home. With the operating systems we mention in this article, you can copy data back and forth, perform backups, along with some advanced tasks (such as establishing a VPN connection or installing a mail server) including plugins to extend OS capabilities.

  Here we are about to list some best NAS solutions to help you if you are planning to data
management using open-source software in 2020.

**GnuCash 3.8 [4]**

GnuCash is a personal and small business finance application, freely licensed under the GNU GPL and available for GNU/Linux, BSD, Solaris, Mac OS X and Microsoft Windows. It's designed to be easy to use, yet powerful and flexible. GnuCash allows you to track your income and expenses, reconcile bank accounts, monitor stock portfolios and manage your small business finances. It is based on professional accounting principles to ensure balanced books and accurate reports.

GnuCash can keep track of your personal finances in as much detail as you prefer. If you are just starting out, use GnuCash to keep track of your checkbook. You may then decide to track cash as well as credit card purchases to better determine where your money is being spent. When you start investing, you can use GnuCash to help monitor your portfolio. Buying a vehicle or a home? GnuCash will help you plan the investment and track loan payments. If your financial records span the globe, GnuCash provides all the multiple-currency support you need.

**Clementine Music Player 1.3.9 Released for Testing (How to Install) [5]**

Clementine, an open-source audio player inspired by Amarok 1.4, released version 1.3.9 (then 1.3.92) a few days ago. Here's how to install it in Ubuntu.

Though the last version 1.3.1 was released more than 3 years ago, Clementine player is still in active development, and version 1.3.9 (as well as 1.3.92) was released in recent days as the test release. However, there's no announcement, no change-log so far. They seem to be the development releases for the next major release.
