- [Security updates for Tuesday](#) [2]

Security updates have been issued by Debian (intel-microcode and libbsd), openSUSE (chromium, LibreOffice, and spectre-meltdown-checker), and SUSE (mozilla-nspr, mozilla-nss and python-azure-agent).

- [How AI and Cybersecurity Will Intersect in 2020](#) [3]

So much of the discussion about cybersecurity's relationship with artificial intelligence and machine learning (AI/ML) revolves around how AI and ML can improve security product functionality. However, that is actually only one dimension of a much broader collision between cybersecurity and AI.

- [Best of TechBeacon 2019: Security is in the hot seat with privacy laws](#) [4]

New laws such as the California Consumer Privacy Act (CCPA) and the European Union's General Data Privacy Regulation (GDPR) have put substantial pressure on organizations to bolster their security practices this year. Adding to the urgency were the near-constant reports of data breaches, an ever-evolving threat landscape, and a growing volume of attacks.
