The evolution of a Linux sysadmin

By *Rianne Schestowitz*

Created 23/01/2020 - 10:50am

Submitted by Rianne Schestowitz on Thursday 23rd of January 2020 10:50:09 AM Filed under [Linux](#) [1] [OSS](#) [2]

We've all got a story, right? I don't know if anyone would read mine, but, to the right audience, it might sound familiar, or at least relatable. My life is sort of fractured between two things I'm passionate about. One is the off-road industry, and the other is open source software. Some time ago, I was involved in a YouTube "challenge" where a bunch of us off-road enthusiasts were asked to share our story, and I told the tale of how I got involved in "Jeeping" and why we do what we do in that space. Here, I am about to tell the other side of my story, where I'm a computer guy with a bunch of nerd cred. So hang on while I tell you the story of a broke high-school kid who stumbled into a career.
