I have uploaded a set of fresh Slackware Live Edition ISO images. They are based on the liveslak scripts version 1.3.5. The ISOs are variants of Slackware-current ?Tue Feb 18 05:20:50 UTC 2020? with the 5.4.20 kernel but without PAM. The PLASMA5 variant is my february release of ?ktown? aka KDE-5\_20.02 .

Download these ISO files preferably via `rsync://slackware.nl/mirrors/slackware-live/` (or its mirror `rsync://slackware.uk/people/alien-slacklive/` but allow that 24 to sync up) because that allows easy resume if you cannot download the file in one go.
