Submitted by Roy Schestowitz on Saturday 29th of February 2020 07:43:58 PM Filed under [Ubuntu](#) [1]

The upcoming Ubuntu 20.04 release will ship with a Snap version of Ubuntu Software app by default.

But while Ubuntu?s default software management tool will become pre-seeded Snap app starting in 20.04 existing Snap builds of Calculator, Characters, and Logs will be reverted to their repo versions.

As noted on Ubuntu Discourse, the ubuntu-desktop and ubuntu-minimal meta-packages now pull in the Ubuntu Software Snap app in place of the regular apt/repo version.

To be clear: this is not a new app store. It is the same Ubuntu Software store as currently shipped, and is still based on GNOME Software. It just packaged as a Snap application.
