Installing the latest version of Inkscape on Chrome OS just got a whole lot easier [4]

We use Gravit Designer on the daily as our go-to vector editing and design tool but for a long time, Inkscape was always in the old tool bag. Problem was, using Inkscape on Chrome OS in the past required Crouton and the unofficial path to dual-booting Linux on your Chromebook. With the advent of the Crostini Project and Linux apps support, that has changed and for many, installing Inkscape free software on a Chromebook has been a game-changer for productivity. While we no longer use Inkscape, it is still an incredible vector editor and we recommend it for users who aren’t ready to make the jump to the pro version of Gravit that runs you $49.99/year.

Chrome OS 80 makes graphic intensive Linux apps so much better [5]

As we’ve seen in the past few months, Linux apps on Chrome OS have come a long way. There’s still work to be done and there are new features that are on the way or that have just launched, but the overall feel of Linux apps on Chromebooks is way more cohesive than it was
just 6 months ago.

- **Chrome browser may get an official Snap package for Linux** [6]

  As of late, I spend a good majority of my time digging into Linux on Chrome OS and testing what works and what doesn’t. As the Command Line series takes shape, we’ve become a little keener to Linux-related commits in the Chromium repository. There’s so much that you can do with Linux apps on Chrome OS but the Crostini project still has its limitations due to the nature of the technology. Running applications in containers requires some workarounds for certain things that are normally native on full Linux distributions.

- **Brave Browser Has Reached 12 Million Monthly Active Users** [7]

  Brave, the popular crypto-integrated browser, has surpassed its previous adoption records.

  As of Mar. 5, Brave had 4 million daily active users (DAU) and 12 million monthly active users (MAU). Based on Brave’s previous usership statistics, this means that Brave attracted approximately 2 million monthly active users and 700,000 daily active users over the past three months.
