- **FuryBSD 12.1 overview | A Powerful, Portable, FreeBSD Desktop** [3]
  
  In this video, I am going to show an overview of FuryBSD 12.1 and some of the applications pre-installed.

- **Open Source Security Podcast: Episode 188 - Depressing news sucks, we're talking about cheating in video games** [4]
  
  Josh and Kurt talk about video games. Yeah, video games. Specifically about cheating in video games. There's a lot of other security themes in the discussion. With the news being horrible these days, we needed to talk about something fun.

- **GNU World Order 345** [5]
  
  Words of encouragement and solidarity during the COVID-19 pandemic.
The many commands of the **cdrtools** package, including a bunch of useful utilities for **.iso** files, such as **isoinfo** and **isodump**.
