  The technology stack behind Dfuse?s advanced blockchain APIs has been made open-source, according to a March 19 announcement. These APIs are primarily used in EOS development. Cointelegraph took the opportunity to interview the CTO of Dfuse, Alexandre Bourget, who revealed some of the far-reaching consequences of this for the EOS community.

- O'Reilly Media, known for its influential open source conferences and books about coding, has laid off 75 people and shuttered its events business [3]

  [Ed: "The community version is free forever." That means there's a proprietary tier.]

  RT-Thread, an open-source embedded real-time operating system that has launched its one-stop development tool: RT-Thread Studio Integrated Development Environment (IDE).

  [...]  
  The community version is free forever.
• SD Times Open-Source Project of the Week: Coyote [6] [Ed: Microsoft's openwashing of .NET is so ugly that it called it "Coyote" and Microsoft-connected sites promote it]

• Adobe Open-Sources Adaptive, Accessible Color Palettes Generator [7]

• New WSO2 Identity Server Release Provides Passwordless Authentication to Bring Greater Security and Simplicity to Users [8]

• GFT Awarded Global Google Anthos Service Partner Status [9]

• InnerSource: A better way to work together on code [10]

• New version of open-source E-invoice validator ZUV being released for ZUGFeRD 2.1 [11]

  The new version supports the new versions of the e-invoicing standards Factur-X 1.0.05 and ZUGFeRD 2.1, which will be released by their respective organizations on the same day.
