- Highlights of YaST Development Sprint 96 [2]
  
  While many activities around the world slow down due to the COVID-19 crisis, we are proud to say the YaST development keeps going at full speed. To prove that, we bring you another report about what the YaST Team has been working on during the last couple of weeks.

  The releases of openSUSE Leap 15.2 and SUSE Linux Enterprise 15 SP2 are approaching. That implies we invest quite some time fixing bugs found by the testers.

- Indonesian LibreOffice community: Online translation marathon [3]
  
  Communities around the world help to translate and localise LibreOffice in over 100 languages. We really appreciate their efforts!

- Update on openSUSE + LibreOffice Conference [4]
  
  Organizers of the openSUSE + LibreOffice Conference had a meeting this week to discuss various topics surrounding COVID19 and how it may affect the conference and planning for it.

  At this point, it is uncertain what restrictions governments may keep in place in the coming months. While October is some months away, there are many aspects we are considering as to how to run the openSUSE + LibreOffice Conference.
Travel restrictions, flights, hotel and venue availability, event capacity and our community members' ability to attend the conference are all factors we are considering. We hope to make a decision about the conference at the latest by mid-June.

- **Daniel Stenberg: The curl roadmap 2020 video** [5]

  On March 26th 2020, I did a live webinar where I talked about my roadmap visions of what to work on in curl during 2020.

- **Molly de Blanc: SCaLE 18x** [6]

  The GNOME presence was felt throughout the conference with a special GNOME Beers and pre-release party on the first day of the conference, Thursday, March 5th. GNOME information flyers were also included inside every attendee bag.

  This presence carried on to our booth where we were able to connect with GNOME community members, contributors, and enthusiasts as well as tote our merchandise, including a brand new GNOME t-shirt, and stickers. Thank you to the number of supporters who assisted us at the booth including Foundation staff, Melissa Wu, Caroline Henriksen, Neil McGovern, and Rosanna Yuen, along with Foundation members Matthias Clasen, Sriram Ramkrishna, and Nuritzi Sanchez.
