- [Intel Media Linux Driver Q1-2020 Released With Tiger Lake Features, Better VP9 Encode](#)[3]

Intel's open-source multimedia crew has released their Media Driver Q1'2020 build for Linux users. This Intel Media driver is what provides Video Acceleration API (VA-API) capabilities for Intel GPU-based video encode/decode for Broadwell through next-gen Tiger Lake.

The Intel Media Driver Q1-2020 release has continued its bring-up of Tiger Lake. New features for Tiger Lake that are now exposed on the video front are HEVC SCC (Screen Content Coding) decode, better robustness, enhanced tile mode support, and other changes.

- [Linux Foundation, LF Networking, and LF Edge Announce Rescheduled Dates and Full Agenda for Open Networking & Edge Summit North America 2020](#) [4]

The Linux Foundation, the nonprofit organization enabling mass innovation through open source, along with co-hosts LF Networking, the umbrella organization fostering collaboration and innovation across the entire open networking stack, and LF Edge, the umbrella organization building an open source framework for the edge, announced today the rescheduled event dates for Open Networking & Edge Summit North America (ONES, formerly Open Networking Summit) and the complete session line-up.

ONES North America 2020 will take place September 28-30 at the JW Marriott LA Live in Los Angeles, California. The summit line-up features prominent speakers from AT&T, eBay, Ericsson, Huawei Technologies, Rancher Labs, Red Hat, Toyota Motor Corporation, Verizon, VMware, Wells Fargo, Yelp, and more. The full event agenda is available [here](#).

- ['State of the Edge,' the Project to Define Edge Computing, Now Part of Linux Foundation](#) [5]

LF Edge, the edge-focused project that the Linux Foundation started early last year, is growing. On Wednesday, State of the Edge, an open project to define, explain, and quantify an edge computing ecosystem, officially became part of LF Edge. The Open Glossary of Edge Computing, which had been a stand-alone project within LF Edge, is getting rolled into State of the Edge.

- [Fintech Open Source Foundation Joins Linux Foundation to Expand and Accelerate Development Across Financial Services](#) [6]

The Linux Foundation, the nonprofit organization enabling mass innovation through open collaboration, and the Fintech Open Source Foundation (FINOS), a nonprofit whose mission is to accelerate adoption of open source software, standards and best practices in financial services, today announced that FINOS will become a Linux Foundation organization. To enable this effort, the Linux Foundation has agreed to acquire the FINOS operating assets.

The Linux Foundation will position FINOS as its umbrella project through which to advance further development of open source and standards within the financial services industry. The FINOS team, led by Executive Director Gabriele Columbro, will join the Linux Foundation. Columbro will continue in his role.
