MNT Reform DIY Arm Linux laptop has been in the works at least since 2017. The open source hardware laptop is also fully modular with Boundary Devices Nitrogen8M SoM featuring NXP i.MX 8M quad-core Cortex-A53 processor and 4GB RAM, M.2 NVMe SSD storage, and standard, replaceable 18650 batteries.

The good news is the laptop is now almost ready for prime-time and has been launched on Crowd Supply with price starting at \$999 in DIY kit form without storage, and \$1,300 for a complete, assembled system with 256GB NVMe storage. If you don't have that amount of money to spend, but would like to support the project, a \$40 MNT Reform T-shirt is also offered. Alternatively, the motherboard only goes for \$550.
