Following yesterday's release of Qt 5.15 LTS as the last series before Qt 6.0, The Qt Company has now released a new Qt Online Installer.

Qt Online Installer 3.2.3 is out with a few translation fixes and they have reworked their "Qt Open Source usage" page. The page lays out the open-source usage obligations for the toolkit under the GPLv2/GPLv3/LGPLv3. The page also allows users to buy Qt or choose the right license and lays out the various obligations when using the open-source version.
