As a computer software distribution package, Ubuntu and Debian are utilized in two ways...

Desktop Operating System
Server

Although they are similar in many ways, they have their differences. Ubuntu is based on the testing branch of Debian and often, Debian involves too many manual works and so it is not recommended for beginners. While Ubuntu is easy to use for beginners, it is not as stable as Debian in its built. Let us have a comparison between Debian vs Ubuntu.

[3]

[Debian Ubuntu]
