- [Internet Explorer is dead as Microsoft kills off 25-year-old browser](#) [5]

Microsoft has finally killed Internet Explorer The browser will be finished on 17 August, 2021, the company said.

- [\[PC Linux OS\] Vivaldi browser updated to 3.2.1967.45](#) [6]

Vivaldi is a new web browser based on Chromium that is built by an Opera founder. It?s aimed mostly at power users, but it can be used by anyone.

- [\[PC Linux OS\] Opera browser updated to 70.0.3728.119 \[7\]](#)

Opera is a Chromium-based browser using the Blink layout engine. It differentiates itself because of a distinct user interface and other features.

- [Flashpeak Slimjet browser updated to 27.0.7.0 \[8\]](#)

Slimjet is built on top of the Chromium open-source project on which Google Chrome is also based. It enjoys the same speed and reliability provided by the underlying blink engine as Google Chrome. However, many additional features and options have been added in Slimjet to make it more powerful, intelligent and customizable than Chrome. In addition to that, Slimjet DOES NOT send any usage statistics back to Google's server like Google Chrome, which is a growing concern for many Chrome users due to the ubiquitous presence and reach of the advertising empire.
