LibreOffice 7.1 Layout Updates and "typical errors when creating presentation templates"

By Roy Schestowitz

You know the LibreOffice community work hard on the LibreOffice 7.1 Christmas release. Did you know that LibreOffice has 7 different UI Layouts? With the next release, our uses will be informed after the installation. Thanks to Heiko for the new dialog.

- [LibreOffice 7.1] Layout updates

- Your typical errors when creating presentation templates. Part 1
Try click somewhere on slide in area with rectangles. You can select any from these rectangles include the largest grey rectangle that author used as background for all composition. Its all are just shapes! This is an absolutely wrong way when you create a presentation template!
