Hosting services for Arm single board computers where you pay a monthly fee for a board, and have it hosted in a datacenter with Internet access and easy provisioning have been around for over six years.

Last summer, we reported that Mythic Beasts and mini Nodes had added Raspberry Pi 4 hosting plans to their offerings, and others commented there were also other companies. But I’ve just been informed IKOULA, a hosting company based in France, had introduced Raspberry Pi 4 ?micro server? hosting plans starting at just 4.99 Euros ex. VAT per month.
Debian Ubuntu
