2020 was for sure no good year for most people around the world. A lot of us are affected directly or indirectly by the currently still raging COVID-19 pandemic. Let’s hope that 2021 will bring better fortune at least in this aspect.
Still, good stuff happened in 2020, too, not all was bleak. I read already some wrap ups of 2020 from others like Nate and Aleix. A lot stuff happened inside the KDE community this year.
Kate and it’s closely related parts KTextEditor & KSyntaxHighlighting evolved a lot in 2020, too. Let’s take a look at the highlights out of my perspective :=)
