- [This week in KDE: text reflow in Konsole!](#) [2]

This week a huge new feature landed in Konsole: it now reflows the text when you resize the window! This feature can be turned off if you don't like it, but comes on by default. It works really well. Thanks very much to Carlos Alves and Tomaz Canabrava for this work! It will be released in Konsole 21.04.

- [KDE Will Reflow Text In Konsole On Window Resizing, Kirigami Icons Now Use Less RAM - Phoronix](#) [3]

KDE developers have remained very busy in the new year working to improve their open-source desktop stack.

Following last week's near total rewrite of the KWin compositing code there has been an interesting batch of new improvements this week. Some of this week's highlights include:

- KDE's Konsole now re-flows text when resizing the window. The functionality is enabled by default (but there is an option to disable it).
