Kiwi TCMS has applied for GSoC 2021

Dear open source hackers, we are happy to share that Kiwi TCMS has applied to Google Summer of Code 2021 as a mentoring organization!

While we're very early in the program timeline and we still don't know whether Kiwi TCMS will be accepted or not we'd like to use this opportunity and outline several areas which are good candidates for GSoC fellows to work on. Some of the tasks are also eligible for our open source bounty program. The majority of them require some knowledge of Python and Django.

Kiwi TCMS - Project roadmap 2021

The big goal towards which we are striving is to turn Kiwi TCMS into a sustainable open source project.
