The biggest change in Nitrux 1.3.8 is the upgrade to the latest and greatest KDE Plasma 5.21 desktop environment, which brings numerous new features and improvements. In fact, the first point release, KDE Plasma 5.21.1, is used in this new Nitrux version.

The KDE Plasma 5.21 desktop environment in Nitrux 1.3.8 is accompanied by the latest KDE Frameworks 5.79 and
KDE Applications 20.12.2 open-source software suites, and features a new default window decoration forked from SierraBreezeEnhanced.
