He is best known for his groundbreaking DNS cache-poisoning research that prompted an industry-wide scramble to address a major weakness in the way the web worked.
White House 'standing down’ emergency response groups to SolarWinds, Microsoft [attacks] [5]

The Biden administration is ?standing down? coordinated efforts by several key agencies to respond to recent major cybersecurity incidents including the SolarWinds hack, a senior administration official announced Monday.

Anne Neuberger, President Biden?s deputy national security advisor for cyber and emerging technology, said the two unified coordination groups (UCGs) that were convened to respond to both the SolarWinds hack and recently discovered vulnerabilities in Microsoft?s Exchange Server would be scaled back.

Google, Amazon Spent Millions Lobbying While Facing Bipartisan Scrutiny [6]

Google spent $2.7 million on federal lobbying in the three months ending March 31, according to disclosures filed with Congress. That?s a 49% increase from the same period a year earlier, and comes as the company has been steadily increasing its Washington investments after a two-year decline. Global policy chief Karan Bhatia reorganized the Washington office when he took over in 2018.

[...]

Amazon boosted its lobbying spend by 11% in the quarter to $4.8 million, a company record and a reflection of the company?s sprawling business interests. The Seattle-based company said in its filing that it lobbied on a wide range of topics, from logistics to cloud-computing and a communications satellite program.
