I Want to Learn LibreOffice

This is a collection of recommended videos and tutorials to practically learn LibreOffice for beginners divided to Writer (word processor), Calc (spreadsheet), and Impress (presentation). They are excellent, thorough, and rich of examples user guide made by TheFrugalComputerGuy (videos) and Ahuka (tutorials) -- they are people who care deeply about LibreOffice. If you want to learn LibreOffice, we suggest you start with their tutorials. Thank you very much for them for making these tutorials patiently for years!

If you prefer learning by reading books or written tutorials, Prof. Kevin O'Brien, also known as Ahuka, one among speakers behind Hacker Public Radio -- a popular internet show about technologies --, made a thorough guide for Writer, Calc, and Impress you can learn by reading. Interestingly, each tutorial is accompanied by its audio recording from the Radio you can listen too. It is worth learning. No other one made such excellent tutorials can be read freely on the web (outside of the official tutorials) for LibreOffice up to today.

LibreOffice Macro Team: progress report

Macros help users to automate common tasks in LibreOffice. In September 2019 we announced a new team in our community to work on macro support. The last progress report was published in April 2020, so it is high time to look into what has happened since then.
The biggest single event was the introduction of ScriptForge Libraries in LibreOffice 7.1. ScriptForge and its documentation is a collaboration between Jean-Pierre Ledure, Alain Romedenne and Rafael Lima. You can read more about it in the January 2021 blog post and the work-in-progress Help content.

**LibreOffice Conference: Call for Papers is Open !** [4]

The Document Foundation invites all members and contributors to submit talks, lectures and workshops for this year’s LibreOffice Conference, which will take place online. The event is scheduled from September 23 to 25, Thursday to Saturday. Whether you are a seasoned presenter or have never spoken in public before, if you have something interesting to share about LibreOffice, ODF, the Document Liberation Project or the ODF Toolkit, we want to hear from you!

Proposals should be filed by June 30, 2020, in order to guarantee that they will be considered for inclusion in the conference program.
