It’s been almost a year since the last Calculate Linux release, which celebrated project’s 20th anniversary, and now a new major release saw the light of day, Calculate Linux 21, introducing a new flavor for Linux gamers.

Meet Calculate Container Games, a new Calculate Linux flavor designed as a solution for playing modern games on Steam anywhere, on any device. It is based on the Calculate Scratch Server flavor and uses Valve’s recently released
Steam Link app to play on any TV set, phone, laptop, tablet, etc.

Linux
