Your Microphone NEEDS This Linux Audio App

RTX Voice-style noise filtering on Linux? WITHOUT any required hardware? That's the dream. Meet NoiseTorch, an incredible audio utility for Linux that works on ANY application (not just OBS). Let me demo it for you and hear the magic for yourself! WEAR HEADPHONES during this video for the best experience.

Building a 10-Node Kubernetes Cluster on Raspberry Pi & Ubuntu Server

Have you thought about setting up your very own Kubernetes cluster consisting of multiple Raspberry Pi's? It's not as hard as it sounds, and in this video, I'll show you how to set it up. Although this video will show the process of creating a ten node cluster, you don't have to have 10 nodes - as long as you have at least two, you'll be all set.

Plex Skeptics | Self-Hosted

Plex announces some big plans that make us a little nervous, Alex solves Chris’s tablet
performance woes, and we chat about Prometheus.

Plus, our thoughts on Duplicati alternatives and more.

- **LHS Episode #410: The Weekender LXXI** [6]
  It's time once again for The Weekender. This is our bi-weekly departure into the world of amateur radio contests, open source conventions, special events, listener challenges, hedonism and just plain fun. Thanks for listening and, if you happen to get a chance, feel free to call us or e-mail and send us some feedback. Tell us how we're doing. We'd love to hear from you.

- **Linux Malware goes undetected since 2018?!** [7]
  A new Linux malware has been discovered that targets 64-bit Linux installs including IoT devices. Potentially linked to the Torii botnet, this malware's mysterious origin and obfuscated plugin system makes analysis quite difficult.
