- **Ubuntu Touch on the Pinephone - is this the best Linux mobile interface?** [3]
  
  I already covered Phosh, the mobile port of GNOME, and Plasma Mobile, both running on the pinephone. Now it's time to take a look at the other main alternative for mobile Linux interfaces, the one that has been around for a while now: Ubuntu Touch, or Lomiri.

- **The Bryan Lunduke Interview** [4]
  
  The first interview I've ever done in the Studio. Was a blast!

- **Reality 2.0 Episode 70: Apple AirTags and Privacy** [5]
  
  Tune in to our new episode! Katherine Druckman, Doc Searls, and Petros Koutoupis talk Apple Airtags and privacy.
