- **SleePi sounds alarm when Raspberry Pi detects sleepiness** [2]

- **My 6-node 1U Raspberry Pi rack mount Cluster** [3]

The rack unit you see above was assembled from 6 'frames', 6 hot-swappable Pi carrier trays, 2 rack mount ears, and a couple lengths of threaded rod for rigidity.
It was printed from these plans from russross on Thingiverse; Russ Ross also made an assembly video, and shows how you can build a 2U 12-Pi enclosure using the same basic design, with interchangeable Pi trays!

- **May 2021 production delays and updates!** [4]

At least we got the STMP15x-SOM and STMP1(A13)-EVB blank PCBs and by the end of next week they will be ready to order.

- **Raspberry Pi Rack - 6 node 3D Printed 1U Pi cluster** [5]

I got tired of having Raspberry Pis hanging about my office. So I found a really nice 3D model for a 1U Pi rack by russross on Thingiverse, printed it, and put it in my new rack.
