- Raspberry Pi GPIO support in Ubuntu | Ubuntu [3]

  We are proud to announce that Ubuntu 21.04 includes support for the GPIO pins on the Raspberry Pi. This has been a long time coming. We know. With support for the camera modules and Bluetooth added last year GPIO was the obvious next step. But with our Raspberry Pi focused engineers working to make sure there was Pi support for the Ubuntu Core 20 launch earlier this year, GPIO got pushed back. But not longer.

  This is all because we want to build a more interactive community around Ubuntu on the Raspberry Pi. A big part of building a community like this is starting conversations. That started with our call for feedback and to ?try things out?, and continues next week (June 1st) when Will Wilson (jawn-smith, the author of the tutorial), Dave Jones (waveform and long time Ubuntu Pi guy), and I sit down on a YouTube and Twitch live stream to talk about Ubuntu on Raspberry Pi, the past, the future, and the community.
The Ubuntu in the wild blog post ropes in the latest highlights about Ubuntu and Canonical around the world on a bi-weekly basis. It is a summary of all the things that made us feel proud to be part of this journey. What do you think of it?

The nature of the security landscape itself makes it impossible to be completely prepared for the new threats coming in. The number and the diversity of attacks keep on increasing, which pose the question: do you really need immediacy to have a secure environment? Focusing on the short term negatively impacts the long term, and companies need to shift their approach to be more secure. In this article, Nikos Mavrogiannopoulos, Product Manager at Canonical, presents the benefits of Extended Security Maintenance (ESM).
