Development on Xubuntu 21.10 has kicked off with some new additions to the seed. Expanding Xubuntu's core application set continues to make it easy to use and meet the needs of its users.

I'm finally getting back to regular FOSS development time, this time focusing again on Xubuntu. Resuming team votes and getting community feedback has kicked off development on Xubuntu 21.10 "Impish Indri". Recent team votes have expanded Xubuntu's collection of apps. Read on to learn more!
