Open Practice Library basics: Showcasing and improving

The Open Practice Library is a repository of open practices and principles used during engagements by Red Hat's Open Innovation Labs. In the previous post in this series, we discussed how to plan and execute a sprint/iteration. In this post, we will talk about showcasing our work and continuously improving.

FlashGrid announces support for RHEL 8 and Oracle Linux 8

FlashGrid Inc. has announced RHEL 8 and Oracle Linux 8 operating systems support with its newly released FlashGrid Cluster version 21.06.

Enterprise customers use FlashGrid engineered cloud systems with Linux OS for running mission-critical Oracle databases, including clustered Oracle RAC databases, in AWS, Azure, and GCP clouds. The databases typically stay in production for multiple years with non-stop 365x24x7 operation. Minimizing any disruptive changes that might affect database uptime is important in such environments.
