- [Stable Channel Update for Desktop](#) [3]

The Chrome team is delighted to announce the promotion of Chrome 93 to the stable channel for Windows, Mac and Linux. This will roll out over the coming days/weeks.

Chrome 93.0.4577.63 contains a number of fixes and improvements -- a list of changes is available in the log. Watch out for upcoming Chrome and Chromium blog posts about new features and big efforts delivered in 93.

- [Google rolling out Chrome 93 on Mac, Windows, Android, iOS - 9to5Google](#) [4]

Following version 92's release on Android, Mac, Windows, and Linux, the next release of Google's browser is rolling out. Chrome 93 is here today as a smaller update.

- [Chrome 93 Released With WebOTP Cross-Device Support, CSS Module Scripts - Phoronix](#) [5]

Google is shipping Chrome 93 today as the latest stable version of their web browser.

Chrome 93 brings WebOTP API cross-device support to the desktop where if connected via

the same Google Account across devices can seamlessly handle one-time pass-codes sent to your mobile device. Chrome 93 on the developer front also exposes the Multi-Screen Window Placement API. This new API makes it easier to manage several displays and can be used for use-cases like presentations where one display may be showing a slide deck while another display is showing the speaker notes, managing multiple windows for tool panes like for image and video editors, or virtual trading desks with showing multiple related windows. With Chrome 93 this new Multi-Screen window Placement API is exposed as an origin trial.
