# MenuLibre 2.2.3 Released

By *Roy Schestowitz*

Created 26/09/2021 - 6:33pm

Submitted by Roy Schestowitz on Sunday 26th of September 2021 06:33:40 PM Filed under [Software](#) [1]

PrefersNonDefaultGPU was added to the FreeDesktop.org Desktop Entry Specification in version 1.4. It's a hint for the desktop environment to use a non-discrete, more powerful GPU, if it is available. Support for this key was recently added to Xubuntu and elementary, and is making it's way to other desktop environments as well.

X-GNOME-UsesNotifications is used by GNOME, elementary, and other GTK desktops (possibly others as well) to inform the environment that an app can send notifications. This enables management of those notifications through a single interface. This feature is seen in GNOME and elementary.
