Gaming is a beautiful hobby that many people are engaging with. Across all demographics people are busy creating their own digital farms, working together in combat, or simply socializing while maintaining a space-ship, free of impostors. All of this can be done on Fedora Linux. And while it doesn't have a name for being flashy, looks can be deceiving. Keep reading to find out how you can play the latest video games on Fedora Linux.

With its mission statement emphasizing features and innovation, Fedora is often on the forefront of embracing new technologies, the latest Linux kernels and the latest drivers. All without sacrificing stability or reliability. Fedora won't cripple itself in an attempt to be first, but it will certainly try to lead by example.
