- [Linux overview | Feren OS 2021.10 - Invidious](#) [3]

In this video, I am going to show an overview of Feren OS 2021.10 and some of the applications pre-installed.

- [Feeling Wyze | Self-Hosted 56](#) [4]

Local self-hosted video capture with AI object detection just got easy. Morgan joins us to detail his Frigate setup and its optional tight integration with Home Assistant.

Plus, our new favorite up time monitoring tool and an easy way to add Tailscale and other apps to OPNsense with community plugins.

- [Hackaday Podcast 141: LowFER Badges, Outrun Clocks, Dichroic Lamps, And Piano Action | Hackaday](#) [5]

Hackaday editors Mike and Elliot Williams catch up on a week's worth of hacks. It turns out there are several strange radio bands that don't require a license, and we discuss this

weekend's broadcast where you can listen in. It's unlikely you've ever seen the website check-box abused quite like this: it's the display for playing Doom! Just when you thought you'd seen all the ESP32's tricks it gets turned into a clock styled after Out Run. Mike geeks out over how pianos work, we're both excited to have Jeremy Fielding giving a Keynote talk at Remoticon, and we wrap things up with a chat about traffic rules in space.

[How A 85€ Laptop Is Helping Me Go Through Uni! - Kockatoo Tube](#) [6]

- 

[Proxmox VE Full Course: Class 13 - Networking - Invidious](#) [7]

Setting up a separate network for your virtual machines is a great idea, especially since that allows you to segregate your management network.

- 

[Valve just FIXED the Steam Deck's BIGGEST PROBLEM! - Invidious](#) [8]

- 

[SMLR E327 ? The Second Reboot](#) [9]

Intro:

Tony Bemus, Tom Lawrence, Phil Porada and Jay LaCroix

Sound bites by Mike Tanner
