CompuLab's \$201-and-up IOT-GATE-RPi gateway features the RPi CM4 plus GbE, 10/100, DVI-D, 3x USB 2.0, 40-pin, and optional 4G, WiFi/BT, COM, CAN, DIO, USB 3.0, NVMe, and PoE.

In 2017, CompuLab announced a compact IOT-GATE-RPi gateway equipped with a Raspberry Pi Compute Module 3. The company has now followed up with a slightly larger gateway with the same name that advances to the Raspberry Pi Compute Module 4 (RPi CM4). The new IOT-GATE-RPi starts at \$201, with volume discounts ranging down to \$134 in 1K quantities.
